Art Unit: 2627

The title of the invention is not descriptive. A new title is required that is clearly indicative of the invention to which the claims are directed.

The specification has not been checked to the extent necessary to determine the presence of all possible minor errors. Applicant's cooperation is requested in correcting any errors of which applicant may become aware in the specification.

The references cited in the International Search Report filed on May 30, 2006 were not considered because the examiner was not provided with a copy of the references. The applicant is requested to provide such documents for consideration by the examiner in response to this office action.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

Claims 1-5, 7, 8, 10-12 and 14 are rejected under 35 U.S.C. 102(b) as being anticipated by Okada et al. (US 2002/0194618).

Okada et al. discloses a method and apparatus for attaching information. An acquiring device acquires a parameter of the information to be attached and a parameter of a specific content, wherein the information to be attached corresponds to the specific content. An editing device edits the acquired parameter of the information to be attached and the acquired parameter of the specific content into a synchronous file. See figures 18 and 22, for example. The synchronous playing file comprises an XML file as claimed. See paragraphs 0194-0249.

Claims 6, 9 and 13 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Any inquiry concerning this communication should be directed to Paul Huber at telephone number 571-272-7588.
